

RJ45 Connector Protective Cap

Product number: 990714

Product Overview

The WBH01 is a captive Ethernet connector protective cap, which can be installed onto a CAT cable in a way that it stays on until removed. The Ethernet connector of the CAT cable can then be effectively protected from damage during transportation and storage, and extends its service life.

Product Features

- Ethernet connector protective cap with tether strap.
- Effectively protects the CAT cable connectors.
- It can be installed on the finished CAT cable.
- Dimensions: 3*15*16mm.
- Minimum quantity of 100pcs per pack.
